XM Instant Traffic and weather is a service we as subscribers can use for information, safety, and planning. NAB has no right to stop us from getting this information. While I do not get this information for my area, it is valuable and useful for many people. NAB can compete with or give better or more up to date data, they do not need FCC rules to help them compete. XM should be allowed to broadcast what ever makes their subscribers happy. WE CAN CHANGE THE STATION AND HAVE! NAB wants to protect their own interests, don't let them infringe on my rights.

Thank you.
